

# Carpe Diem NetDocuments Connector

Operational efficiency is at the top of every law firm's agenda

## Capturing time just got easier

Legal technology applications that complement each other maximise their respective value by delivering improved efficiency and enhanced performance. The Carpe Diem NetDocuments Connector was developed specifically with this in mind. Uniting these two market-leading solutions has allowed time spent working on documents to be recorded automatically.

The Carpe Diem Timefinder function prompts fee earners to record any time spent on a client matter, allowing even the smallest time increments to be recorded seamlessly. Using this innovative connected technology, users can also easily find missing time spent working on the documents and emails that have been saved in NetDocuments.

## Transparency increases satisfaction

By accurately capturing all time worked on every document, firms are able to provide clients with greater visibility, and accuracy, in regards to the time fee earners have spent on their matter.

This not only ensures verifiable, correct billing, it generates trust and helps increase levels of client loyalty.

This solution will also help ease the pressure on fee earners by supporting them in hitting their billing targets. Using two market-leading applications in unison streamlines the flow of time data, providing a more efficient and smoother experience for all users throughout the firm.

## Key benefits

- Increase revenues by improved adoption of time recording
- Reduce time leakage by ensuring fee earners can find missing time more easily
- Enable greater billing transparency and accuracy
- Grow client trust and loyalty
- Ease pressure on fee earners and help them hit billing targets
